

Project Profile

St-Croix School

Central Canada

A 6,640 sq. ft. two storey renovation project for the Roman Catholic School Board. The renovations included three 23' x 34' classrooms per floor, a 10' wide hallway and two classrooms which were converted to accommodate the needs of special students. One of the converted classrooms became a sewing room and the other became a teaching kitchen complete with a dining room area. A special washroom for the physically challenged complete with a change bed was also incorporated.

Services: Provided strictly architectural design and detailing services for the retrofit work of the school and assured the adaptability of the existing floor spaces for the intended use. Provided all specifications for the materials, including the specifications for the specialty items for the non-traditional teaching rooms.
