

Project Profile

Fort Wellington Office Building

Central Canada

This facility, designed by the architectural staff of Public Works Canada, included the renovation of an existing visitors centre with a 7,200 sq. ft. addition containing a new lobby and reception area complete with a resource library, meeting room, lunch room and staff room with change rooms and washroom facilities and a display area for the visiting public.

Services: HSP's work included the preparation of construction drawings, cost estimates, and tender documents for the mechanical's energy efficient ventilation system and all electrical work and special lighting requirements for the building security lighting room and gift shop.
